

Greetings.

This proceeding, if passed will infringe on my rights as a consumer. If a program is broadcast on television, I have the right to record the program and watch it in my own home for my own use. The proceeding will impair my and every other American's right to do so.

It will certainly create more problems than it solves. Enforcing copyright infringement does not mean the rights of individuals need to be taken away. It means that those enforcing the copyright laws need to get off of their butts and do some work to find the pirates and bring them to justice.

Should this come to pass, I will be boycotting all hardware and services that utilize this technology.

Thank you for your time.

Jason Gallo
